### NOTES: Read All Instructions Before Beginning Installation

- Only qualified mechanics experienced in the installation and removal of suspension components should perform this installation.
- Use of a hoist and screw jack is highly recommended and will substantially reduce installation time.
- Never work on or under a vehicle unless it is properly supported.
- Tire Rotation: In order to increase the life of your tires, it is recommended to rotate your tires every 3,000 miles.

#### FACTORY FRONT BAR REMOVAL

- Begin by raising the vehicle and support it with the proper safety equipment. Note: Never work on or under a vehicle that is not supported by the proper safety equipment.
- 2. Remove the underbody plastic and aluminum covers.
