

# Street Performance Catalog

Product Line Overview

# Quality Reliability Capability

All words synonymous with all Eibach products, proven through time to persevere through whatever the road throws at you. Over the dirt or the tarmac, Eibach's focus on quality from the beginning stages of our products ensures we are a name you can trust.

Designed, built and tested in house, all Eibach suspension components cater to your vehicles demands. As a worldwide leader in the OEM and aftermarket industry, Eibach products are built upon decades of research and race-winning technology ensuring a high-quality product that performs and goes beyond industry standards.

## PRO-KIT

### Performance Lowering Springs

The perfect answer for most popular street cars that dramatically improves both a vehicle's street performance and appearance.

- Precision wound hi-tensile steel alloy, cold-formed, tempered and shot-peened for long lasting performance and durability
- Progressive spring design for excellent ride quality
- Lower center of gravity – lowers vehicle up to 1.5" (varies by application)
- Engineered and tested to work perfectly with stock dampers

## SPORTLINE

### Performance Lowering Springs

Performance spring set created for the extreme enthusiast - the one who craves a race-car attitude for maximum street performance, with the lowest possible drop, but with the exceptional ride quality you expect from Eibach.

- Motorsport inspired handling and appearance
- Precision wound hi-tensile steel alloy, cold-formed, tempered and shot-peened for long lasting performance and durability
- Lower center of gravity – lowers vehicle up to 2.3" (varies by application)
- Progressive design for balance of sport performance and excellent ride quality

## SPECIAL EDITION

### PRO-KIT Springs

PRO-KIT springs for lower production, specialty vehicle applications.

- Precision wound hi-tensile steel alloy, cold-formed, tempered and shot-peened for long lasting performance and durability
- Lowers ride height up to 2.3" (varies by application)
- Progressive spring design for balance of sport performance and excellent ride quality
- Precision hand finished coil-ends
- Special Edition matte black coating
- Engineered and tested to work perfectly with factory electronic/standard damper systems

## DRAG-LAUNCH

### Competition Springs

Made of the same high quality materials as our PRO-KIT and Motorsport springs, Eibach's DRAG-LAUNCH kits are precision engineered to improve weight transfer and control axle torque.

- Controlled weight transfer provides maximum traction and reduced wheel spin
- More consistent power transfer for launches
- Lower ¼ - mile ET's
- Precision wound hi-tensile steel alloy, cold-formed, tempered and shot-peened for long-lasting performance and durability
- Flat gray finish

## PRO-LIFT-KIT

### Performance Lift Springs

Lift springs designed for popular off-road oriented cars and CUV's.

- Developed to provide a balanced ride quality with off-road capability
- Application specific tuning and fitment
- Block resistant design for sag-free consistent ride height
- Manufactured using race proven materials and technology
- Heavy-duty corrosion and abrasion resistant coating
- Designed and tested for use with factory dampers

## PRO-DAMPER

### Performance Shocks

Eibach PRO-DAMPERS complement the unique characteristics of Eibach PRO-KIT and SPORTLINE springs, taking full advantage of the increased spring rate and lower center of gravity. The result is enhanced performance throughout the entire working range of the suspension.

- Improved high performance handling and stability
- Precision tuned damping to match PRO-KIT and SPORTLINE spring systems
- Controlled, compliant ride quality
- Easy-direct replacement

## ANTI-ROLL KIT

### Performance Sway Bars

Eibach ANTI-ROLL-KIT reduces body roll through increased stiffness over stock bars. The result: increased handling and cornering grip in any performance-driving situation.

- Performance tuned sway bars for improved handling and reduced body-roll
- Perfectly balanced for optimum neutral-steering handling and precise turning response
- Precision formed hi-tensile steel alloy, cold-formed, tempered and shot-peened for long-lasting performance and durability
- Greaseable urethane bushings
- Precision forged ends and OEM-style pressed bushings locators

## Adjustable End Links

### Custom and Vehicle-Specific Systems

Eliminate sway bar preload and avoid control arm contact using Eibach adjustable spherical sway bar endlinks.

- Adjustable length for optimized stabilizer bar angle
- Developed and tested for street and off-road performance
- Off-road applications include heavy-duty Aurora® rod ends
- Hex ends and knurled body for easy adjustment
- Precision-fit misalignment spacers and hardware included
- System sold in pairs

## PRO-SPACER

### Wheel Spacers

Fine tune for perfecting wheel fitment and increase track width with a wide variety of sizes and applications.

- Exact fitment by using minimal production tolerances, resulting in exceptional wheel balance
- All applications tested in rigid durability and fatigue tests
- Made from high-tensile-strength aluminum alloy
- High-grade corrosion protection through a special coating process (salt spray test according to DIN 50021)
- Significant weight advantage compared to wheel-spacers made from steel
- Available in standard finish or black

## PRO-ALIGNMENT

### Adjustable Suspension Components

Fine tune your alignment to correct excessive camber, or utilize the wider range of adjustment to further increase performance.

- The perfect solution to correct excessive negative camber and prevent uneven tire wear
- Wider range of camber adjustment suitable for street or track tuning
- Compatible with all lowered suspension
